Note: This is the last month for which the Award Rates of Pay Indexes will be compiled on the June 1976 base. A new series based on June 1985 will be introduced in the next issue of this publication — see Explanatory Notes paragraphs 16 and 17.

MAIN FEATURES

INDEXES OF AWARD RATES OF PAY, AUSTRALIA, ADULT PERSONS BASE: JUNE 1976 = 100.0

Over the 12 months to November 1987, the increase in the Weekly Award Rates of Pay Indexes was 3.8% for adult male wage and salary earners and 3.7% for adult female wage and salary earners.

From October to November 1987, the indexes show increases in a number of series. The increases are due mainly to the inclusion of a number of National Wage Case second-tier increases in the Manufacturing; Construction; Electricity, gas and water; Wholesale; and Retail trade industries. The decrease in the index for the New South Wales Mining industry is due to a decrease in the lead bonus paid to miners.

Revisions to the indexes have resulted from the inclusion of a number of National Wage Case second-tier increases effective from September 1987 and October 1987.

Of the awards included in the indexes, only a small number were reported as having the National Wage Case second-tier increase in effect, at the time of compilation.

EXPLANATORY NOTES

Introduction

This publication contains indexes of award rates of pay. The indexes have been compiled on a monthly basis from June 1976.

- 2. The construction of the indexes is similar in general design to other indexes such as the Consumer Price Index and the Wholesale Price Indexes and is based on a representative 'basket' of award classifications. The indexes are constructed by weighting award rates of pay for selected classifications according to the pattern of employment existing in May 1976.
- 3. All award rates of pay series are expressed as index numbers with a reference base of June 1976 = 100.0. Index numbers expressed in monetary values for June 1976 were published in Appendix A of the February 1983 issue of this publication.
- 4. The indexes of award rates of pay, like other indexes depict movements. They are designed to measure general TRENDS in award rates of pay. They do not measure relative LEVELS of average award rates of pay between States and industries and exclude the effect of changes in the relative importance of industries, awards and occupations.
- 5. The award rates of pay series replace an earlier wage rates index series published in *Wage Rates*, *Australia* (6312.0).

Scope and coverage

- 6. All full-time adult wage and salary earners whose rates of pay are normally varied in accordance with awards, determinations or registered collective agreements are represented in the indexes. Employees covered by unregistered collective agreements (i.e. those agreements made by an employer with a group of employees and which are not registered with a Federal or State industrial arbitration authority) are considered to be similar to employees covered by awards. The rates prescribed in the more important of these have also been included in the indexes.
- 7. The indexes are based on awards covering employees in private and government employment except serving members of the Defence forces, Australian Standard Industrial Classification (ASIC) Division A (Agriculture, forestry, fishing and hunting) and ASIC Subdivision 94 (Private households employing staff).
- 8. Rates of pay applicable to approximately 11 per cent of full-time adult wage and salary earners who are not covered by awards, determinations or registered or unregistered collective agreements are excluded from the indexes.

Design of the indexes

Selection of classifications

9. The source used to base the indexes was the May 1976 Survey of Employee Earnings and Hours. The survey collected information on occupations, awards and award classifications from approximately 70,000 selected employees. Those employees who were full-time adult

employees covered by awards, determinations or collective agreements were identified and stratified by State and occupation group. A sample of approximately 3,990 employees was then selected.

- 10. Each selected employee represented an individual classification under an award, determination or collective agreement. A classification relates to a description of a specific class of employee for which a given rate of pay is prescribed under an award, determination or collective agreement (e.g. Metal machinist, Class 1). The classifications for inclusion in the award rates of pay indexes comprise those classifications selected by the above method.
- 11. The sampling method meant that some award etc. classifications were selected more than once. The total number of different classifications included in the indexes is 2,387, prescribed in 897 individual awards, determinations or collective agreements. For the component of the indexes that relates to wage earners only (shown in Section 3 of this publication) the corresponding numbers are 2,625 individual award classifications, 1,735 different award classifications and 697 awards.
- 12. The sample design used for the selection of classifications for the indexes ensured that the indexes could be produced at a satisfactory level of reliability for all cross-classifications included in the series.

Collection of award information

13. Information on award rates of pay for selected classifications is obtained from a variety of sources. The primary updating sources are advices of award variations determined or authorised by industrial tribunals. A number of secondary sources are also used including the Employers' Federation of N.S.W. and the Victorian Employers' Federation. Information obtained by these means is used to update award rates of pay for each selected classification on a monthly basis and used for the compilation of the monthly indexes.

Weighting

14. The award rates of pay indexes are fixed weighted indexes. The weights are based on employee data at the State and occupation level as obtained from the May 1976 Survey of Employee Earnings and Hours (see paragraph 9). Each month, rates of pay corresponding to the selected classifications are weighted according to these State by occupation weights to form the monthly indexes. For details of the weighting structure used for the indexes see Appendixes B and C of the September 1982 issue of this publication.

Reference base

15. The base period for the award rates of pay indexes is June 1976 and all series are referenced to a base of June 1976 = 100.0.

Rebasing award rates of pay indexes

16. A rebasing of the Award Rates of Pay Indexes is nearing completion. The weighing pattern for the new series will be based on the industry and occupation

distribution of employees existing in May 1985. The base for the new series, June 1985, has been determined using data obtained frm the Survey of Employee Earnings and Hours conducted in May 1985. For more information regarding the conceptual and methodological issues associated with the rebasing of the indexes, and changes in concepts and methodology between the current and rebased series to Information Paper: Award Rates of Pay Indexes (6343.0).

17. Rebasing of indexes such as the award rates of pay indexes need to be made from time to time, to take account of changes since the base period. Because the weights are fixed, the award rates of pay indexes are no longer responsive to structural changes in employment (i.e. the distribution of employees in terms of industry, occupation, award coverage) which have taken place since 1976.

Revision of the indexes

18. In some cases, when awards etc. are varied, the new award rates are made retrospective. In addition there is sometimes a considerable delay in the receipt of notification of changes in award rates in respect of the classifications included in the indexes. Because of these factors the figures in this publication are subject to revision. Revisions for States and industries are published in the normal monthly tables of this publication. Revised figures for each industry group in each State are available on request.

Definitions

- 19. Award rates of pay. The award rates used in the compilation of the indexes refer to rates of pay at the end of the month. The rates generally consist of the base rate and any allowances or loadings that are applicable to ALL workers under a specific award classification, e.g. industry allowances. Loadings payable because of length of service (e.g. service increments) are included where appropriate. Loadings that apply only in special circumstances (e.g. those payable because of working in wet, dirty or confined places, excess fares incurred due to location of building site, etc.) are excluded. The indexes include supplementary payments specified in a number of awards such as the Metal Industry Award Part 1 and the Western Australian Metal Trades (General) Award.
- 20. Weekly rates and hourly rates. The award rates of pay series are expressed in the form of both weekly and hourly rates of pay. Weekly rates of pay refer to rates prescribed for a full week's work (excluding overtime). Hourly rates are calculated by dividing the weekly rate of pay by the standard hours of work as prescribed in awards etc. For many salaried awards (e.g. teachers, university lecturers), no specific hours are prescribed. Indexes of hourly award rates of pay therefore have been compiled for wage earners only. These exclude certain wage awards in shipping and stevedoring for which hourly rates are not available.
- 21. Wage and salary earners. The main index series refer to award rates of pay for all wage and salary earners within the scope of the indexes (see paragraphs 6 to 8).

For the benefit of users, separate indexes have been produced relating to wage earners only (which are broadly comparable with the scope and coverage of the old Wage Rates Index). In order to produce separate indexes for wage earners and wage and salary earners it was necessary to designate all classifications in the index as either a wage or salary earner. The following definitions were adopted:

Wage earners—those classifications corresponding to occupations which were engaged mainly in manual work regarded as blue collar occupations. Remuneration for wage earners is usually stated in terms of a weekly wage.

Salary earners—those classifications corresponding to occupations which were engaged mainly in non-manual work or regarded as white collar occupations. Remuneration for salary earners is normally stated in terms of an annual salary (which is converted to a weekly rate for index purposes).

- 22. Federal awards include awards of, or collective agreements registered with, the Australian Conciliation and Arbitration Commission, the Coal Industry Tribunal, the Flight Crew Officers Tribunal and determinations of the Australian Public Service Arbitrator. Also included are unregistered collective agreements operative in more than one State or Territory where these are significant in the particular industries to which they refer.
- 23. State awards include awards, or determinations of, or collective agreements registered with, State industrial tribunals together with certain unregistered collective agreements where these are significant in the particular industries to which they refer and operate within one State only.

Classification of industry and occupation

24. Industry is classified according to the 1978 edition of Australian Standard Industrial Classification (ASIC) (1201.0 and 1202.0). Data classified by occupation used as input to the indexes was classified according to the Classification and Classified List of Occupations (1206.0) revised June 1971. Commencing with September 1986 issue, a new occupation group — Professional Health Workers has been added to Table 6.

Standard weekly hours of work

25. Estimates of standard weekly hours of work are included as an appendix to the June and December issues of this publication commencing with the June 1983 issue. The estimates refer to weighted average standard weekly hours of work where the weighting is based on the weights used for the construction of the award rates of pay indexes. The appendix table includes all wage earners and only those salary earners where standard hours are specified in the award, etc.

General increases in award wages

26. Details of general increases in award wages as a result of wage hearings since 1980 are included as an appendix to those issues of this publication which correspond to the month in which general wage increases have been awarded. Information for earlier periods was published in *Labour Statistics*, *Australia*, 1980 (6101.0) and earlier issues of that publication.

Reliability of the estimates

27. Since the indexes are based on information relating to a sample of classifications, they are subject to sampling variability.

Comparability of results

28. When comparisons are made between period-toperiod movements in the Award Rates of Pay Indexes (ARPI) and movements in Average Weekly Ordinary Time Earnings (AWOTE) for full-time adults published in Average Weekly Earnings, States and Australia (6302.0) it is important to recognise the different coverage, scope, definitions and methodology used in the construction of each series. In particular, the AWOTE series includes a number of payments additional to award rates of pay used in compiling ARPI. Allowances covered under awards which are not industry or occupation-wide in their application such as site, travelling, height and dirt allowances, are excluded from ARPI but included in AWOTE. The AWOTE series also includes other payments such as shift penalty payments and over-award pay. A significant number of employees are not covered by awards but are included in AWOTE. The AWOTE series is also affected by compositional changes in the labour force. However ARPI is not similarly affected, being a fixed-weight index constructed from a representative 'basket' of occupations selected from the May 1976 Survey of Employee Earnings and Hours. It is subject to reselection and rebasing at infrequent intervals. Other factors affecting comparisons between the two series include seasonal influences on earnings and differences between the two series in the treatment of retrospective pay increases. A detailed description of the methodology, scope and definitions used in compiling AWOTE is featured in Catalogue No. 6302.0.

Unpublished statistics

- 32. In some cases, the ABS can also make available information which is not published. This information may be made available in one or more of the following forms: microfiche, photocopy, data tape, computer printout, clerically-extracted tabulation. Generally, a charge is made for providing unpublished information. Inquiries should be made to the officer whose name appears in the *Phone Inquiries* section of the inquiries box at the front of this publication, or to Information Services in the nearest ABS office.
- 33. Current publications produced by the ABS are listed in the Catalogue of Publications, Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publications Advice (1105.0) which lists publications to be released in the next few days. The Catalogue of Publications, and the Publications Advice are available from any ABS office.

⁽A) INDEXES OF HOURLY RATES ARE CALCULATED BY DIVIDING THE MINIMUM WEEKLY WAGE RATE BY THE STANDARD HOURS OF WORK PRESCRIBED IN AWARDS, DETERMINATIONS AND COLLECTIVE AGREEMENTS. THE HOURLY INDEXES EXCLUDE CERTAIN OCCUPATIONS IN SHIPPING AND STEVEDORING BECAUSE PARTICULARS FOR THE COMPUTATION OF HOURLY RATES ARE NOT AVAILABLE. (B) INCLUDES: WOOD, WOOD PRODUCTS AND FURNITURE; NON-METALLIC MINERAL PRODUCTS; AND MISCELLANEOUS MANUFACTURING. (C) EXCLUDES EMPLOYEES IN THE DEFENCE FORCES. (D) EXCLUDES EMPLOYEES IN THE DEFENCE FORCES, AGRICULTURE, SERVICES TO AGRICULTURE AND EMPLOYEES IN PRIVATE HOUSEHOLDS EMPLOYING STAFF.

⁽A) INDEXES OF HOURLY RATES ARE CALCULATED BY DIVIDING THE MINIMUM WEEKLY WAGE RATE BY THE STANDARD HOURS OF WORK PRESCRIBED IN AWARDS, DETERMINATIONS AND COLLECTIVE AGREEMENTS. THE HOURLY INDEXES EXCLUDE CERTAIN OCCUPATIONS IN SHIPPING AND STEVEDORING BECAUSE PARTICULARS FOR THE COMPUTATION OF HOURLY RATES ARE NOT AVAILABLE.

TABLE 12. WAGE EARNERS : INDEXES OF HOURLY AWARD RATES OF PAY (A) INDUSTRIES, STATES

^{*} SUBJECT TO SAMPLING VARIABILITY TOO HIGH FOR MOST PRACTICAL USES.

(A) INDEXES OF HOURLY RATES ARE CALCULATED BY DIVIDING THE MINIMUM WEEKLY WAGE RATE BY THE STANDARD HOURS OF WORK PRESCRIBED IN AWARDS, DETERMINATIONS AND COLLECTIVE AGREEMENTS. THE HOURLY INDEXES EXCLUDE CERTAIN OCCUPATIONS IN SHIPPING AND STEVEDORING BECAUSE PARTICULARS FOR THE COMPUTATION OF HOURLY RATES ARE NOT AVAILABLE. (B) INCLUDES: WOOD, WOOD PRODUCTS AND FURNITURE; NON-METALLIC MINERAL PRODUCTS; AND MISCELLANEOUS MANUFACTURING. (C) EXCLUDES EMPLOYEES IN THE DEFENCE FORCES. (D) EXCLUDES EMPLOYEES IN THE DEFENCE FORCES, AGRICULTURE, SERVICES TO AGRICULTURE AND EMPLOYEES IN PRIVATE HOUSEHOLDS EMPLOYING STAFF.
